## **DETAILED ACTION**

## Response to Arguments

Applicant's arguments filed 6/7/07 have been fully considered but they are not persuasive.

Claims 1-81 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Taken as a whole the claims recite an undue multiplicity of claims by virtue of the unreasonable number of claims presented would tend to obfuscate, confuse, and becloud the claimed invention. Because the examiner believes that in his judgment that twenty (20) claims are sufficient to properly define applicants' invention, applicants are required to select certain claims, not to exceed twenty-five for examination on the merits, See M.P.E.P. 2173.05(n). To be complete the non-selected claims must be cancelled or the applicant(s) must present appropriate arguments as to why the above rejection is in error. Note most patents (80%) have less than twenty claims while patents in excess of i00 claims are less than 0.344% of all cases filed and thus rare (See Federal Register: October 5, 1998 (Volume 63, Number 192, Page 53507). Note also the new excess claim fees effective 12/8/04 as evidence of what is considered to be unreasonable.

The applicants arguments filed 6/7/07 have been considered but are unpersuasive of error inasmuch as the wealth of evidence presented show that the number of claims is unreasonable and the rejection is rare. The rejection under this

Application/Control Number: 09/965,098 Page 3

Art Unit: 3694

paragraph is made final and claims 25-81 are withdrawn from further consideration.

Upon further review of this case, a restriction has been applied to claims 1-25.

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 8-10, drawn to an auction for an item, comprising:
  a first phase wherein an asking price for the item decreases at predetermined
  intervals when the auction is a seller's auction and increases at predetermined
  intervals when the auction is a buyer's auction, and
  a second phase after the first phase wherein the asking price starts at a level equal
  to a first bid placed by a first bidder during the first phase and periodically increases
  when the auction is a seller's auction and decreases at predetermined intervals
  when the auction is a buyer's auction until no additional bids are received from the
  first bidder and/or additional bidders, the auctioned item being awarded to a last
  bidder in the second phase, classified in class 705, subclass 26.
- II. Claims 1-7 and 11-24, drawn to a method/computer system/machine-readable medium of conducting an auction for an item, comprising the steps of: setting a current asking price for the item; posting the current asking price and enabling bidding at the current asking price; periodically decreasing and posting the current asking price until a first bid is received from a first bidder at the then current asking price, and awarding the item to the first bidder at the then current asking price unless, after the first bid is received, at least one additional bidder bids higher than the first bid within a

Art Unit: 3694

predetermined time interval after the first bid is received, classified in class 705, subclass 37.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an auction for an item, comprising: a first phase wherein an asking price for the item decreases at predetermined intervals when the auction is a seller's auction and increases at predetermined intervals when the auction is a buyer's auction, and a second phase after the first phase wherein the asking price starts at a level equal to a first bid placed by a first bidder during the first phase and periodically increases when the auction is a seller's auction and decreases at predetermined intervals when the auction is a buyer's auction until no additional bids are received from the first bidder and/or additional bidders, the auctioned item being awarded to a last bidder in the second phase. Invention II has separate utility such as setting a current asking price for the item, posting the current asking price and enabling bidding at the current asking price; periodically decreasing and posting the current asking price until a first bid is received from a first bidder at the then current asking price, and awarding the item to the first bidder at the then current asking price unless, after the first bid is received, at least one additional bidder bids higher than the first bid within a predetermined time interval after the first bid is received. See MPEP § 806.05(d).

Application/Control Number: 09/965,098

Art Unit: 3694

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Behrang Badii whose telephone number is 571-272-6879. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any response to this action should be mailed to:

Mail Stop Amendment Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450 Art Unit: 3694

## or faxed to (571)273-8300

Hand delivered responses should be brought to

United States Patent and Trademark Office Customer Service Window Randolph Building 401 Dulany Street Alexandria, VA 22314

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 3600 Customer Service

Office whose telephone number is (571) 272-3600.
